## January 2024 Variance Analysis

January revenue was under budget by \$205,240,019 which was impacted by weather related events. Year-to-date revenue is under budget by \$196,193,643 primarily attributed to lower Video Lottery sales. Video sales were under budget in January by \$202,623,131 and Year-to-Date Video sales are under budget by \$259,022,417. Trends from the Department of Administrative Services indicate lagging video lottery sales are due to a softer economy and not video specific.

January Net Profit fell short by \$9,171,520 on a plan of \$79,348,542. While functional expenses remain under budget, we have highlighted notable variances in our operating statement.

### **Retailer Commissions: January variance- \$2,920,151; YTD (\$1,217,826)**

- Traditional commissions year-to-date are over budget by \$2,232,139.
  - About two-thirds of the overage is due to the budgeted commission rate being too low. Retailer commissions incorporate sales commission, validation commission, and prize selling bonus. The budgeted rate was 8.003% while the actual rate is about 8.591%. The actual rate is following the previous year trends.
  - Sales over forecast caused the other one-third of the overage.
- Video commissions year to date are under budget by \$1,014,313.
  - The budgeted rate was 1.795%. However, the actual rate is higher at 1.835%. This created a negative rate variance which added to the overall variance.
  - Year-to-date sales are \$259,022,417 under budgeted, saving \$1,217,826 in expected commissions.

### **Game Vendor Charges: January variance- (\$554,766); YTD \$84,541**

January Game Vendor Charges are over budget by \$554,766. This unfavorable variance is driven by sales being more than expected for traditional and sports products. Both products' charges are based on sales. Year-to-date the expenses are within 3% of the budget.

### **Tickets- January Variance \$390,177; YTD \$801,929**

January had a favorable variance of \$390,177 which is explained by the weaker than expected sales in Scratch-Its due to weather related events. Year-to-Date, there is a favorable variance of \$801,929. This favorable condition is attributed to the planned revenue forecast when the budget was made assumed a higher forecast vs. actuals. Therefore, usage/timing of new tickets is lower and there is a longer window between reorders.

**Advertising-January Variance \$540,180; YTD \$623,327**

January had a favorable variance of \$540,180 and Year-to-Date favorable variance of \$623,327. The favorable variances are mostly due to the way budgeted dollars are allocated. Another factor is the way campaigns and production may fluctuate throughout the year with various agencies and beneficiaries. It is expected that by June, Advertising will be at approximately 94% of their budget with some cost savings based on renewal negotiations with vendors and products.

**Sales Support-January Variance \$97,936; YTD \$402,036**

January favorable variance of \$97,936 and Year-to-date favorable variance of \$402,036. The favorable variance is due to lower maintenance costs for signs and displays. Materials for maintenance and replacement are significantly lower than originally planned. LED Bulb replacement will occur closer to year end and will be included in the FY 2025 budget. This favorable variance will continue through the remainder of FY 2024.

**Game, Equipment, Parts, & Maintenance (GEPM)-January Variance (\$722,670); YTD \$2,361,231**

January GEPM is unfavorable by \$772,670 due to the purchase of spare parts for the Light & Wonder terminal. This expense was budgeted for FY 2024, but the purchase was allocated to a different month in the budget and will smooth out by year-end. Year-to-Date is favorable by \$2,361,231 due to the spending plan for Video Game Sets being recognized in FY25 and other initiatives related to Video Lottery.

**Interest (Direct & Indirect Expense)**

Unfavorable variances in Interest expense are due to either budgeting low, or not at all, due to the lack of information for projecting these expenses. We were still in the process of implementing GASB 96 (Software Base Subscription Assets) when the budget was prepared. Although the overage to budget is a large percentage, actual amounts are small.

**Other Income/(Expense)-January Variance \$1,272,471; YTD \$6,935,893**

Both January and Year-to-Date positive variances are due to the robust interest earning market. The rate at this time last year was approximately 3.1% compared to 5% currently.

**Public Information-January Variance \$187,102; YTD \$405,399**

January favorable variance of \$187,102 and Year-to-date favorable variance of \$405,399. Expense is lower than expected for both the month and year-to-date. As with Advertising, the variances are driven by the fluctuations that exist within campaigns and direction from our agency. While there will be some cost savings toward year-end, the plan is still on track for the remainder of the fiscal year.

**Market Research –January Variance \$95,203; YTD \$476,921**

January favorable balance of \$95,203 and Year-to-Date favorable variance of \$476,921 are due to the difficulty in estimating costs of studies as some are not scoped when we create the budget. Some planned research did not occur as we paused to work on products while awaiting direction from the Governor.

**Services & Supplies January Variance \$2,283,637; YTD \$10,672,735**

January has a favorable variance of \$2,283,637. Year-to-date has a favorable variance of \$10,672,735. Both January and Year-to-Date favorable conditions are attributable to the following segments:

- Retailer Network Expenses/Recovery Expense & Recovery produce nearly a net effect but is included here for informational purposes. As explained in previous months there was no budget included as contract negotiations for our Network services were ongoing.
- Technology Expenses – January favorable variance of \$327,725 and Year-to-Date favorable variance of \$111,957 are due to purchases not following the budget pattern of equal spending each month.
- Professional Services– January favorable variance of \$1,585,884 and Year-to-Date favorable variance of \$6,657,796 is due to several projects that are still in or just coming out of the RFP process or work efforts that will either not be started this fiscal year or are no longer needed so this positive variance will continue throughout the remainder of the fiscal year.

**Salaries, Wages, & Benefits-January Variance (\$366,145); YTD (\$1,612,709)**

As noted in previous months, January and Year-to-Date variances are due to a formulaic error with Other Payroll Expenses. In calculating Other Payroll Expenses to be applied to budgeted salaries, Other Payroll Expenses were included with salaries when calculating the percentage. This caused the percentage to be lower than it should have been. This has been offset by salaries savings for vacant positions.
